# LGBTQ+ Youths Need Support

LGBTQ+ youth are not inherently prone to suicide risk because of their sexual orientation or gender identity but rather placed at higher risk because of how they are mistreated and stigmatized in society.

**45%** of LGBTQ+ youth seriously considered **attempting suicide** in the past year.

Transgender & nonbinary youth were **2 to 2.5 times as likely to experience serious mental health crisis** compared to their cisgender LGBQ+ peers.

**52%** of LGBTQ+ youth report being **bullied** in the past year.
